Faculty and Staff Honors

-- Issam Mudawar, professor of mechanical engineering, has been named Fellow of the American Society of Mechanical Engineers. Mudawar has received numerous teaching awards, including Purdue's Charles B. Murphy Award for Outstanding Teaching. Mudawar is internationally known for his research on novel heat transfer mechanisms for electronics and avionics, nuclear reactor thermal hydraulics and intelligent materials processing. He is director of the Boiling and Two-Phase Flow Laboratory and the High Heat Flux Research Center. He also is president of Mudawar Thermal Systems, a research and development firm in the Purdue Business and Technology Center that provides solutions to complex thermal management problems in aerospace devices.
